

Dyyno Broadcast Station for Education

High-impact collaboration between students and faculty across the globe

Breakout from the confinement of a classroom

Instant, High-Impact Collaboration

Dyyno Broadcast Station (DBS) for Education provides a portal to share rich multimedia content between campuses, faculty and students, and study groups. Use DBS to create and share powerful educational content – including streaming HD quality lectures, audio, and desktop applications. DBS provides:

- Lowest cost HD video streaming technology available today
- Camera, desktop, and application sharing (including intense graphic rendering software)
- Ease of use. One-click to share. One-click to view
- Minimal infrastructure and setup time
- Microphone and audio support

Why Dyyno Broadcast Station for Education?

Many are seeing DBS as a valuable tool to increase communication and knowledge retention, specifically in:

- **Distance Learning:** Provide real-time or pre-recorded courses to students via the Internet to increase attendance levels and reduce the cost of 100% instructor-led training
- **Campus to Campus:** Increase communication between campuses and bridge the gap to bring your educational communities together
- **Study Groups:** Increase study group participation by providing students a way to meet online to collaborate on projects vs. missed meetings due to schedule conflicts
- **Online Tutoring:** Allow teaching assistant to monitor assignments and projects being conducted on a computer and assist students in need of feedback

Easy, Effective and Enjoyable

Eliminate any technical barriers to communicate with your students remotely!

No specialized software is needed. With just a Windows PC and a network connection, students and faculty can broadcast anywhere at any time!

Their audience only needs a browser to watch the broadcasts – making it as easy as possible to collaborate.

Faculties can even record their lectures for students who missed a class.
